

Mohd Arsh Usmani

Software Engineer

Strong foundation in **Python, SQL, data analysis, and database management**, with hands-on experience in **data validation, data cleaning, reporting, and performance analysis**. Skilled in analyzing large datasets, identifying trends and anomalies, conducting root cause analysis, and transforming complex data into actionable business insights. Experienced in **SQL query optimization, database analysis, dashboard reporting, log analysis, and data quality assurance** across UAT and production environments. Committed to improving data accuracy, operational efficiency, and data-driven decision-making within high-volume financial systems.

WORK EXPERIENCE

Data Analyst

Insolutions Global Limited

09/2025 - Present

Fintech Based

Mumbai

- Worked with high-volume financial datasets, analyzing 100,000+ daily transactions and 10M+ monthly records to identify trends, maintain data integrity, and support operational insights.
- Performed overnight batch checks, monitored ETL pipelines and data interfaces, and ensured continuous system availability and SLA compliance in a 24x7 operational environment.
- Owned end-to-end incident management for 1,200+ production issues — triaging incident queues, performing structured root cause analysis, implementing permanent fixes and workarounds, and maintaining clear stakeholder communication throughout.
- Reduced issue recurrence rate by 40% through systematic problem management aligned to ITIL practices (Incident, Problem & Change Management).
- Used MS SQL Server (T-SQL) and UNIX extensively for database querying, data extraction, troubleshooting, and batch job monitoring across complex multi-system environments — improving processing efficiency by 35%. Configured and maintained 20+ ETL-based outbound data interfaces, monitoring batch schedules, detecting failures in real time, and escalating critical incidents within agreed SLA windows using scheduling and monitoring tooling (Autosys, Splunk).
- Executed data validation and reconciliation across production reporting outputs, reducing output errors by 30%. Authored reusable knowledge articles, delivered end-user training, and coordinated across engineering, operations, and third-party vendor teams to resolve complex application issues and drive continuous improvement — contributing to a 45% reduction in manual batch-related tasks through automation initiatives.
- MS SQL Server-Oracle Database • T-SQL • UNIX • Python • ETL Pipelines • Batch Monitoring • Autosys • Splunk • ITIL • Incident Management • Root Cause Analysis • Power BI • JIRA • Excel

Data Analyst Internship

Just Gigs

09/2024 - 09/2025

Hospitality-Based Company

Navi Mumbai

- **Data Analysis:** Assisted in collecting, processing, and analyzing business data to support decision-making and improve efficiency.
- **SQL:** Skilled in writing and optimizing SQL queries for reporting, data analysis, and database management.
- **Microsoft Excel:** Experienced in advanced Excel functions like VLOOKUP, PivotTables, charts, and data visualization.
- **Web Development:** Basic knowledge of HTML, CSS, and JavaScript for improving data presentation and internal projects.

EDUCATION

Postgraduate Diploma in Master of Science (Data Science)

University of Mumbai Regular

08/2025 - 08/2026

- Creative Head, Model Club, Team Member, Hackathon and Coding Club, R.D National College
- Achievements :Ranked 3rd in Department (Msc Data Science) 89.4 CGPA

Bachelor of Science in (Computer Science)

University of Mumbai Regular

08/2022 - 08/2025

- Creative Head, Model Club, Team Member, Hackathon and Coding Club, Burhani College
- Achievements :Ranked 2nd in Department (BSc Computer Science) 8.43 CGPA

TECHNICAL SKILLS

Python

Django/Flask

Pandas/Numpy/Seaborn/Matplotlib

SQL/MYSQL/Oracle/RDBMS

Power BI

Data Visualization

Data Analysis

Excel

Linux/Unix Commands

NLP

Gen AI

LLM

ML

Git/Github

HTML5

CSS

JS

Jira

SOFT SKILLS

Good Communication

Problem Solving

Active Listening

Team Collaboration

PROJECTS

Bill Genrate -Python, Flask, Tailwind CSS, HTML5

- A smart automation tool that generates your professional bill in just 2 seconds — client details, line items, and totals all automatically.

AI Virtual Assistant -Python, Django, HTML5,MYSQL,AIVEN

- This assistant is designed to streamline information access, reduce manual effort, and enhance user experience through natural language processing and smart automation.
